5.Title of this proposed citizens' initiative: Ending the aviation fuel tax exemption in Europe

6.Subject matter: We call the European Commission to propose to member states the introduction of a tax on aviation fuel (kerosene). The aviation sector enjoys tax advantages despite being one of the fastest growing sources of greenhouse gas emissions.

7.Main objectives: While greener alternatives to aviation are subject to high taxes, the aviation industry benefits from many unjust tax exemptions. Aviation fuel remains untaxed in Europe and Member States don't impose VAT on plane tickets, making aviation a more and more attractive transport mode whereas it is the most carbon-intensive. Taxing kerosene would allow the EU to drastically increase its funding for greener mobility as transport is the fastest growing greenhouse gas emissions sector.
